BUyS Product Snapshot

Indicative Terms

Structure:

- **Underlying:** The S&P 500® Index (Bloomberg: SPX <Index>)
- **Maturity:** March 28, 2013 (5 Years)
- **Participation Rate:** 150% upside participation
- **Index Return Cap:** 48.00% - 51.00% (to be determined on the Trade Date)
- **Maximum Return:** 72.00% - 76.50% of the \$1,000 face amount (to be determined on the Trade Date)
- **Buffer Level:** 20%
- **Downside Risk:** One-for-one downside participation with 20% Buffer

Positioning:

- Equity alternative that facilitates a moderately bullish view on the Underlying.
- 150% upside participation in the performance of the Underlying at maturity, subject to the Index Return Cap.
- The Securities will outperform the Underlying at maturity if the Final Level is below the Initial Level.

Best Case Scenario:

- If the Final Level is above the Initial Level, investors receive 150% of the performance of the Underlying at maturity, subject to an Index Return Cap of between 48.00% - 51.00%, resulting in a Maximum Return of between 72.00% - 76.50% of the \$1,000 face amount (to be determined on the Trade Date).
- An investment in BUyS is not callable or averaged.

Worst Case Scenario:

- Investment in the Securities is partially protected at maturity by the Buffer Level.
- If the Final Level declines from the Initial Level by more than the Buffer Level, an investment in the Securities will decline by 1% for every 1% by which the Final Level declines from the Initial Level by more than the Buffer Level of 20%.
- Maximum loss is 80% of the initial investment, subject to the credit of the Issuer.

Risk Considerations:

- Because the Securities do not offer 100% protection of your initial investment, and the return on the Securities is linked to the performance of the Underlying, you may lose up to 80% of your initial investment.
- Your return on the Securities is limited to the Maximum Return. As a holder of the Securities, you will not benefit from any appreciation of the Index beyond the Index Return Cap of between 48.00% and 51.00% (to be determined on the Trade Date).
- Return on the Securities is linked to the value of the Underlying (without taking into consideration the value of dividends paid on the component stocks of the Underlying).
- An investment in the Securities is subject to the credit of the Issuer.

Investing in the Securities involves a number of risks. See "Selected Risk Factors" on the last page of this product snapshot, "Selected Risk Considerations" in the accompanying term sheet and "Risk Factors" in the accompanying product supplement.

Hypothetical Scenario Analysis at Maturity:

- Hypothetical scenario analysis contained herein does not reflect the reinvestment of dividends and does not reflect advisory fees, brokerage or other commissions, or any other expenses an investor may incur in connection with the Securities.
- No representation is made that any trading strategy or account will, or is likely to, achieve results similar to those shown. Hypothetical results are neither an indicator nor guarantee of future returns. Actual results will vary, perhaps materially, from the analysis below.
- The graph below assumes an Index Return Cap of 49.50%. The actual Index Return Cap will be determined on the Trade Date.

Selected Risk Factors

- **YOUR INVESTMENT IN THE SECURITIES MAY RESULT IN A LOSS** — The Securities do not guarantee any return of your initial investment in excess of \$200 per \$1,000 Security face amount. The return on the Securities at maturity is linked to the performance of the S&P 500® Index (the “Underlying”) and will depend on whether, and the extent to which, the Underlying performance is positive or negative.
- **THE RETURN ON YOUR SECURITIES IS LIMITED BY THE INDEX RETURN CAP** — If the Index Return exceeds the Index Return Cap of between 48.00% and 51.00%, resulting in a Maximum Return of between 72.00% and 76.50% (to be determined on the Trade Date), your payment at maturity will nevertheless be limited to a maximum payment of between \$1,720.00 and \$1,765.00 for each \$1,000 face amount of the Securities you hold.
- **CERTAIN BUILT-IN COSTS ARE LIKELY TO ADVERSELY AFFECT THE VALUE OF THE SECURITIES PRIOR TO MATURITY** — Certain built-in costs, such as our estimated cost of hedging, are likely to adversely affect the value of the Securities prior to maturity. You should be willing and able to hold your Securities to maturity.
- **NO PERIODIC COUPON OR DIVIDEND PAYMENTS OR VOTING RIGHTS** — You will not receive periodic coupon payments on the Securities or have voting rights or rights to receive cash dividends or other distributions.
- **LACK OF LIQUIDITY** — There may be little or no secondary market for the Securities. The Securities will not be listed on any securities exchange.
- **OUR RESEARCH, OPINIONS OR RECOMMENDATIONS COULD AFFECT THE LEVEL OF THE UNDERLYING OR THE MARKET VALUE OF THE SECURITIES** — We and our affiliates and agents may publish research, express opinions or provide recommendations that are inconsistent with investing in or holding the Securities, which could affect the level of the Underlying or the value of the Securities.
- **POTENTIAL CONFLICTS** — Because we and our affiliates play a variety of roles in connection with the issuance of the Securities, including acting as calculation agent and hedging our obligations under the Securities, the economic interests of the calculation agent and other affiliates of ours are potentially adverse to your interests as an investor in the Securities.
- **MANY ECONOMIC AND MARKET FACTORS WILL AFFECT THE VALUE OF THE SECURITIES** — In addition to the level of the Underlying on any day, the value of the Securities will be affected by a number of complex and interrelated economic and market factors that may either offset or magnify each other.
- **THE U.S. TAX CONSEQUENCES OF AN INVESTMENT IN THE SECURITIES ARE UNCLEAR** — Significant aspects of the U.S. federal income tax treatment of the Securities are uncertain, and no assurance can be given that the Internal Revenue Service will accept, or a court will uphold, the tax consequences described in the accompanying term sheet.
